This survey regarding the impact of floods and sewage on homes, roads, businesses, and property in the communities of Cahokia Heights, East St. Louis, Dupo, East Carondelet, Belleville, Fairview Heights, Millstadt, Caseyville, Washington Park, Sauget, Fairmont City, Brooklyn, and Columbia will help locate problem areas and determine strategies and recommendations for fixing flooding and sewage problems in the watershed. This survey is part of a larger planning effort called the Prairie du Pont/Judy's Branch Watershed Project.

Your response to this survey will help the watershed planning team identify areas that have frequent flooding and sewage issues. These areas will then be reviewed to determine how to fix the issues through various potential funding sources.
